

VP700 Digital Color Printer Nationwide Support & Service

Nationwide Service Locations

We know you have high expectations for your equipment purchase - and so do we. Our service providers are highly trained and have extensive experience keeping the equipment we sell operating with minimal down time. We understand the importance of mission-critical form and label applications to your business, that's why we strive to:

- **ELIMINATE DOWN TIME:** By staffing the service desk with trained technicians, we attempt to resolve the issue immediately over the phone. However, if on-site service is required, our standard response time is next day. If you have special time needs, talk to our service staff about a customized service agreement.
- **ELIMINATE FRUSTRATION:** We provide certified technicians you can trust and a dedicated toll-free 800 number that gets you directly to a technician.
- **ELIMINATE FINGER POINTING:** A total system solution including certified consumables, approved labels, quality equipment and service from one source. You make one call and we take care of the rest - quickly resolving issues when and if they do occur.
