

PS50

InfoSealPS

The PS50 is a compact, desktop portable machine for low volume, hand-fed processing of one-piece documentation. And, it's this easy... Print your documents onto pressure seal paper, fold them and put them in the PS50. Instantly they are sealed and ready for mailing!

Fitting easily into any office environment, for low volume on demand sealing or your pre-folded forms or as support for a larger system. It's extremely easy to use. If you can fold it, the PS50 will seal it! With the pressure seal process there's no heat, therefore no mess or risk of burns. By sealing up to 40 documents per minute, the PS50 is much faster than inserting and hand sealing envelopes. With a reverse option any mis-folded or damaged documents can be instantly retrieved.

Technical Specification

Processing speed	Up to 2,400 forms per hour (manual feed)
Monthly Duty Cycle	6,250
Form size	Manual - Up to 6-3/4" wide folded
