

# PRESSURE SEAL

## PS300f Folder/Sealer

### High Volume

The PS300 is the ideal system for processing medium to heavy volumes. Tabletop design allows for easy operation in a convenient office location. It has standard large paper hopper and conveyer, reducing operator form handling. Paper flow is electronically monitored and the system will automatically shut down in the event of any interruption; operations can resume immediately without disrupting document sequence or count. In addition, an out feed counter is a standard feature, to allow easy calculation of processed documents.
